THE SPANISH LAW AND THE ACTS OF THE IOs

Reception: in the Spanish law the acts of the IOs need to be published in the Official State Gazette

Hierarchy: legal and infraconstitutional hierarchy

Application: direct effects and directly applicable. Although there is one exception to this, the acts of the EU shall be published in the OJ becoming part of the domestic law, without requiring publication in the Gazette

Not all the acts of the IOs have normative effect, but there is a certain number of acts that have it:

- Security Council Resolution
- Regulations (EU): direct effect
- Directive (EU): no direct effect, since a national legislation of transposition is required
